DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 17 are drawn to synchronization of policies on different nodes in a network classified in class 707, subclass 201.
- II. Claims 18 – 39 are drawn to migration of policies between network nodes classified in class 707, subclass 203.

Regarding Group I's relationship to Group II, note that synchronization of policies on different network nodes is distinct from migration of a policy from one network node to another. The policy synchronization of Group I is made possible by "a common database of network policies." The policy migration of Group II is made possible by one "local policy database" for each network node that incorporates into a policy hierarchy only those migrating policies that are consistent with the local policy.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

From telephone communication with Shailesh Mehra, Attorney of Record, on May 30, 2007 and June 6, 2007, no election was made to prosecute one of the above two claim groups. Election of one of the above two claim groups must be made by the applicant in replying to this Office Action.
